MIG 240 C-4

MIG/MAG-compact welding machine for steel, stainless-steel and aluminium

MIG 240 C is a MIG/MAG-compact welding machine with very good welding properties. It is special qualified for repair and production of small parts from 0,6 - 6 mm plate thickness. The machine has good welding properties for thin plate.

technical data	MIG 240 C-4 (article no. 05244)
Mains voltage:	3x400 V – 50/60 Hz
Fuse rating:	16At
Welding output:	25 - 240 A
Ratings at 40% ED:	230 A
60% ED:	170 A
Voltage control:	7 steps
Methods of welding:	continuous; spot welding
Wire drive system:	4-rolls \varnothing 37 mm
Wire diameters:	0,6 – 0,8 (1,0) mm
Wire reels:	D/K 200 - 300 (5-15 kg)
Weight:	70 kg
dimensions:	790x280(415)x710 mm
Norm:	EN 60974-1
Protection class:	S

Option:

Accessories:

We recommend the accessory kit welding torch PP100 with connection cable for thin aluminium wire and more freedom of action.

synergic control
