MIG 290 C-4

MIG/MAG-compact welding machine for steel, stainless-steel and aluminium

MIG 290 C is a welding machine with a very good cost/ performance ratio with excellent welding properties. The welding machine has a technical complete equipment, easy to use, robust and reliable. It can be used for all gas mixtures, CO₂ and argon.

technical data	MIG 290 C-4 (article no. 05294)
Mains voltage:	3x400 V 50/60 Hz
Fuse rating:	16 A slow blow
Welding output:	30 - 280 A
Ratings:	280 A / 40% 260 A / 60%
Voltage control:	10 steps
Methods of welding:	continuous; spot welding, soft wire start, burn back control, 2/4-Takt
Wire drive system:	4-rolls ø 37 mm
Wire diameters:	0,6 - 1,0 (1,2) mm
Wire reels:	D/K 200 - 300 5-15 kg
Weight:	110 kg
dimensions:	950x360(485)x840 mm
Norm:	EN 60974-1
Protection class:	S
Option:	digital instruments V/A with run hold function
